#### **DETAILED ACTION**

## Response to Amendments

1. In view of the amendments filed 4/14/2009, the objections to the Specification and the Drawings are hereby withdrawn.

### Claim Rejections

- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. Claims 1, 4-9, and 39 are rejected under 35 U.S.C. § 102(b) as being anticipated by MOORMAN, as set forth in paragraph 5 of the previous Office Action and reprinted below for convenience:

MOORMAN discloses a method and apparatus comprising a flexible bag with an inner contents bag liner (22) locatable within an outer box carton (1) and a neck piece or collar (7), between a bag neck and a carton wall or wall aperture (see Fig. 6), with cooperative fit between respective collar and carton or carton aperture edge profiles.

MOORMAN discloses a container for a flexible bag with a collapsed carton in a compact flat-pack configuration (see Fig. 2). Examiner notes that any flexible bag would be capable of collapsing along with the carton blank, which could then be transported or stored. A flexible bag with a carton wrap or sleeve around a bag leaving exposed a protruding bag neck and collar (see Figure 1). MOORMAN discloses a container for a flexible bag with a lockable closure cover flap integrated with the collar, to inhibit access

Application/Control Number: 10/590,096

Art Unit: 3721

to an underlying bag neck and so bag contents. Examiner considers cover flap 7 to provide a lockable closure.

Regarding claim 5, the injecting of air is being read on the air which would inherently be in the fill tube and thus precede the contents from any fill tube into the bag.

4. Claims 2 and 3 are rejected under 35 U.S.C. § 103(a) as being unpatentable over MOORMAN in view of EEG ET AL, as set forth in paragraph 7 of the previous Office Action and reprinted below for convenience:

MOORMAN discloses a method and apparatus comprising a flexible bag with an inner contents bag liner, as described above.

MOORMAN does not disclose a handle integrated with the collar.

EEG ET AL discloses a bag-in-box package comprising a handle aperture (18) foldably (via 16) formed with the collar for dispensing (22) (see Fig. 1). It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to modify Moorman's container to include a handle formed integrally with the collar in order to provide a hand-hold, which would be useful while pouring the contents out of the container (see EEG ET AL, column 2:1-10).

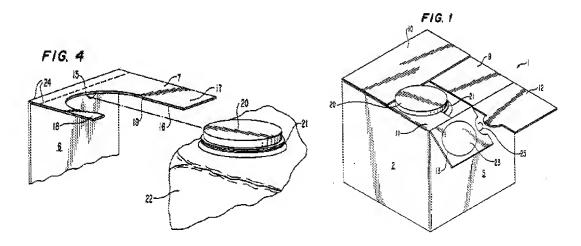

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the invention of MOORMAN by adding a handle, as taught by EEG ET AL, in order to make the product and method more convenient for a consumer.

# Response to Arguments

5. Applicant's arguments filed 4/14/2009 have been fully considered but they are not persuasive.

6. Applicant states on page 7 of his Response that "Applicant submits that the prior art '753 patent is directed to a flexible container that is inserted into an outer carton. Applicant submits that the '753 patent does not disclose or suggest a retention collar, or the particular carton element with a collar aperture. As a result, at least the steps of extending and securing are not disclosed nor suggested by the prior art '753 patent."

However, column 3:55-59 of MOORMAN recites "When the spout 20 is inserted into the aperture 14, the outer peripheral wall of the spout 21 is engaged on both apertures 14 and 15, and the spout 20 is held rigidly in the position shown in FIG. 1."

The outer peripheral wall of the spout (21) is being read on the claimed "retention collar".

#### Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Paradiso. The examiner can normally be reached Monday-Friday, 9:30 p.m. – 6:00 p.m. (ET).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada, can be reached at the number listed below.

Any inquiry of a general nature or relating to the status of this application should be directed to the 3700 Technology Center Receptionist.
